Kevlar® Max wristprotector

This very comfortable wristprotector offers the user maximum Kevlar® protection. The wristprotector combines cut- and punctureresistance and will not slip down anymore because of the added layer of Kevlar® needled felt between the 2 knitwristlayers.

Articlecode	Articlenumber	Size
KT-polsmanchet-3x2x-22 cm	991932220	1 size

Materials used:

- Kevlar® knitwrist
- Heavy duty Kevlar® felt

Description:

100% kevlar® knitwrist with good elasticity. Between the two layers of Kevlar® knitwrist an extra layer of Kevlar® felt is fitted in, to prevent slipping down. The Kevlar® felt liner gives the wristprotector maximum punctureresistance on the inner side of the wrist. The standard length is 22 cm, but can be manufactured in various lengths.

If required we can also make a whole for the thumb. The wristprotector can be washed at 40° C.

Testresults:

EN 388 Cutresistance : 5 (inner side of the wrist) Cutresistance : 4 (backside of the wrist) Puncture resistance : 4 (inner side of the wrist)
