COMFORTABLE

LIGHTWEIGHT

LONGLASTING

PU TECHNOLOGY

Noramax and Noratherm PU boots are the latest addition to Nora boot range. Noramax and Noratherm are made from Polyurethane, this material contains millions of tiny air bubbles making the boots lightweight and giving excellent thermal insulation, in addition hydrolysis protection and anti-UV additives make Noramax and Noratherm hardwearing and durable, lasting up to 3 to 4 times longer than traditional PVC and rubber boots.

COMFORT

Noramax and Noratherm PU boots are designed to give you outstanding comfort, so comfortable you will feel like you're wearing your favourite shoes! Noramax and Noratherm have been designed with you in mind, the anatomical shaped footbed provides arch support and additional material around the ankle gives extra protection. Shock absorbing anti-fatigue heels reduce stress and fatigue in the leg allowing you to wear Noramax and Noratherm boots all day long, to further enhance your comfort ergonomic Ortholite removable insoles are included with every pair of boots, this attention to detail distinguishes Noramax and Noratherm PU boots from other boots in the market.

DESIGN

Noramax and Noratherm PU boots are designed and manufactured in Italy. In addition to comfort our research and development team evaluated real life situations when designing the sole pattern for PU boots, all Noramax and Noratherm PU boots meet the highest level of slip resistance (SRC) and soles are self cleaning. The uppers are practical, smooth & stylish in design making them easy to clean, the boots are finished with a blue lining giving a touch of Italian elegance!
